

LIST OF RECOMMENDATIONS AND LIMITATIONS

Below you will find a list of limitations and recommendations to take into account to prepare your shoot. This list will be periodically updated.

We recommend that you take them into account not only on requesting the occupation permits but also on choosing your locations.

What now appears as a recommendation may become a limitation if the level of impacts is not minimized. Complying with these recommendations and limitations does not mean that your requests are automatically authorized; as you know, each request is assessed individually and many more aspects are taken into account.

In red the new recommendations.
